

2020 September

First Day of Autumn

By: Anna Farmer

On the first day of Autumn, leaves and the weather begin to change. Flowers begin to die, leaves begin to fall, and cold weather begins to start! Trees are very pretty in the beginning of Autumn because that's when they change colors. When it's Autumn that's when halloween rolls around! People start to grow pumpkins so that on Halloween people can carve and cook them into pumpkin pie! Football starts in the fall, that's one of the Autumn activities. People crowd into stadiums and always fight over tickets. Everyone loves watching football when it first starts. On the first day of Autumn everyone starts decorating for fall and Halloween and take down their summer decorations!

Labor Day

By: Keriasia Alford

On Labor Day the first Monday in September, we celebrate American workers. Obviously, these workers have their hands out to the well-being of our country. Peter J. McGuire, a carpenter and labor union leader, was the person who came up with the idea for Labor Day. He believed American workers should be honored with their own holiday. The first day of May is observed as International Labor Day. To add on, It is the Monday of the weekend known as Labor Day Weekend. Generally, Labor Day decorations are all about red, white and blue. After all, this is a very patriotic holiday!

Right as Rain

By: Sophia Smith

On September 14th, 3rd graders made rain gauges as a class experiment. In science class, with the guidance of Mrs. Hammock, they had an awesome time. The 3rd graders made rain gauges for the sole purpose of measurement and learning about climate patterns and precipitation.

Overall the third graders had a fun day learning about science and math at the same time.

“Pleasure in the Job puts perfection in the work.”

Herndon's Constitution Week

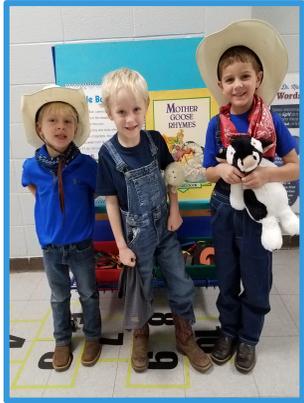

By: Savannah Jester

Herndon Magnet celebrates Constitution Week to bring honor to America's most important document during the week of September 17-23. The United States Constitution stands as a testament to the perseverance of Americans throughout history to maintain their liberties, freedoms and inherent rights. It created an effective national Government, one that is able to balance extensive powers. During this week, Mr Thomas, the principal, takes time every morning to tell the students about the constitution and why it is important to them as citizens. The students at Herndon are eager to learn about their American history.

Track is Back!

By: Maddie Willis

Track is back and better than ever! Herndon track is kicking off for the 2020 - 2021 school year. There are many runners from boys to girls to sixth grade to eighth grade. Everyone is welcome to start track. This year might be different, but there are still people who love to compete to win in a race.

Nursey Rhyme Day

By:Kandice Wilson

Nursery rhyme day is a fun day for the kindergarteners. This was a day for the little ones to dress up a nursery rhyme character and talk about their favorite rhymes like *Goldilocks* and the *Three Bears*, *Little Red Riding Hood*, and more. Teachers and the students have so much fun on this day. This day was adored so much by the little ones. It was so much fun as well. This day would be looked forward to so much that the Kindergartens wouldn't even want to work if Nursery Rhyme Day was tomorrow, they would look forward to it too much! The older kids would always look forward to seeing the little children in their favorite nursery rhyme characters and practicing their rhymes. It's fun for everyone!

6TH GRADE SOCIAL STUDIES FUN

By: Cassie Donaghey

Ms. Boddie's 6th grade class is studying early civilizations. A few days ago they were pretending to be Paleolithic early humans who were hunter-gatherers. Many times these early humans drew on the walls of their caves, depicting an adventure they had. After making up a story, the 6th graders drew their "cave paintings" on the driveway outside. They have already created a fossil, artifact, and a brochure. The next stop in their journey is to create the Fertile Crescent! Have fun 6th grade!

BACK TO SCHOOL NIGHT

By: Cooper Jennings

This years back to school night was very awesome. Teachers did it virtually this year through a website called Loom. The parents loved watching the videos because they were so entertaining and informational. In the videos the teachers introduced themselves and told how this year would be. They talked about the changes in the school due to coronavirus, and assignments that are to be due soon. This years back to school night was very successful!

FALL SURVEY

By:Josey Slack

This September I went around the school and asked 26 people what their favorite thing about fall was 38.5% said going to the corn maze, 7.7% said looking at the fall leaves, 23.1% said Trick or Treating, and 30.8% said watching Hallmark movies.
